

# International seminar on urban policies in the framework of the 2030 Agenda: balance and perspectives in Latin America and Europe

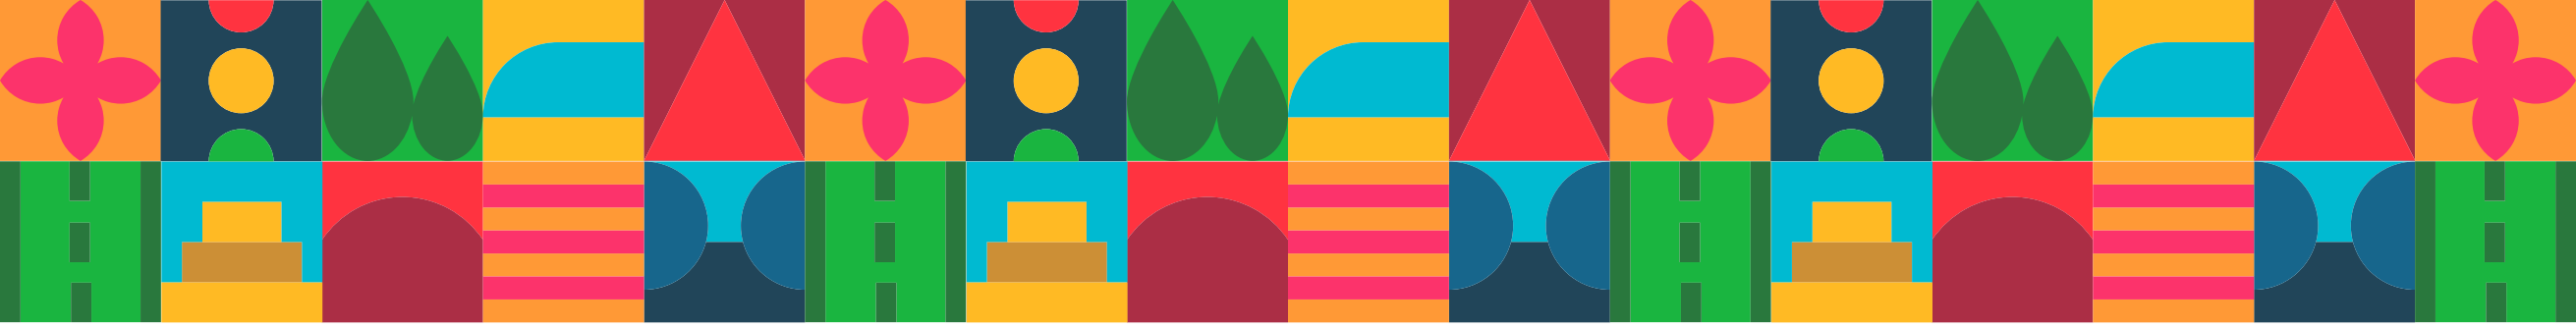

## **University of Salamanca Institute of Latin American Studies**

This international seminar is a second part that continues the work started in the seminar held at the Pablo de Olavide University (Spain) on November 18, 2021, where cases in Europe were worked on, within the framework of the Urban RED 2021 Conference. The second part deals specifically with cases in Latin America.

To establish the motivation for these activities, we must go back to the year 2016, with the Quito Declaration, when what we could call a new time for urban policies on a global scale begins. The Quito Declaration is the starting point for the materialization in terms of public policies of the SDGs with an impact on urban areas, especially SDG 11, specifically oriented to them, as well as instruments aimed at their materialization, such as urban agendas. The year 2016 marks the culmination of a process that had begun a long time ago, in the 1990s, when what we know today as the Integrated Sustainable Urban Development Model began to take shape from various international spheres such as the EU or the United Nations (MDUSI). Said model constitutes a general framework from which to produce public policies taking into consideration not only their substantive dimension, or content; but also its procedural dimension, or process. Consequently, what the MDUSI promotes is a true paradigm shift in the way interventions in urban areas have to be conceived in the coming years.

At this point, six years after the approval of Quito, we have witnessed the proliferation of a large number of initiatives for the territorialization of the SDGs in urban areas, or the development of more or less complex indicator systems, aimed at know the results derived from the implementation of the SDGs. However, there are fewer efforts from the academy to know the impact of the 2030 Agenda and, specifically, what have been the instruments developed for its application in cities with respect to the way in which they are designed, implemented and evaluated. urban policies. To advance these issues, a group of researchers from universities and research centers in Latin America and Europe have been working since 2021 on a comparative basis, taking national cases with landings on learning and experiences in specific cities. These seminars are part of this research initiative, which is expected to soon bear fruit in an international publication and a long-term work agenda between different researchers from both continents.

**April 21, 2022** (spanish time)

**14:45**      **Previous connection.**

**15:00**      **Welcome and brief introduction.**

- Maria Angeles Huete Garcia. Professor of Sociology at the Pablo de Olavide University and the University of Salamanca
- Adrian Rodriguez Miranda. University of the Republic of Uruguay
- Francisco Sanchez. Director of the Institute of Latin American Studies. University of Salamanca

**15:20**      **Balance and perspectives in Argentina. The case of the cities of Rafaela (Santa Fé) and Villa María (Córdoba).**

- Emilia Vidal. Professor at the Institute of Technological and Social Research for Territorial Development (PRAXIS), National Technological University, Rafaela Regional Faculty
- Gimena Loza. Professor at the National University of Villa María

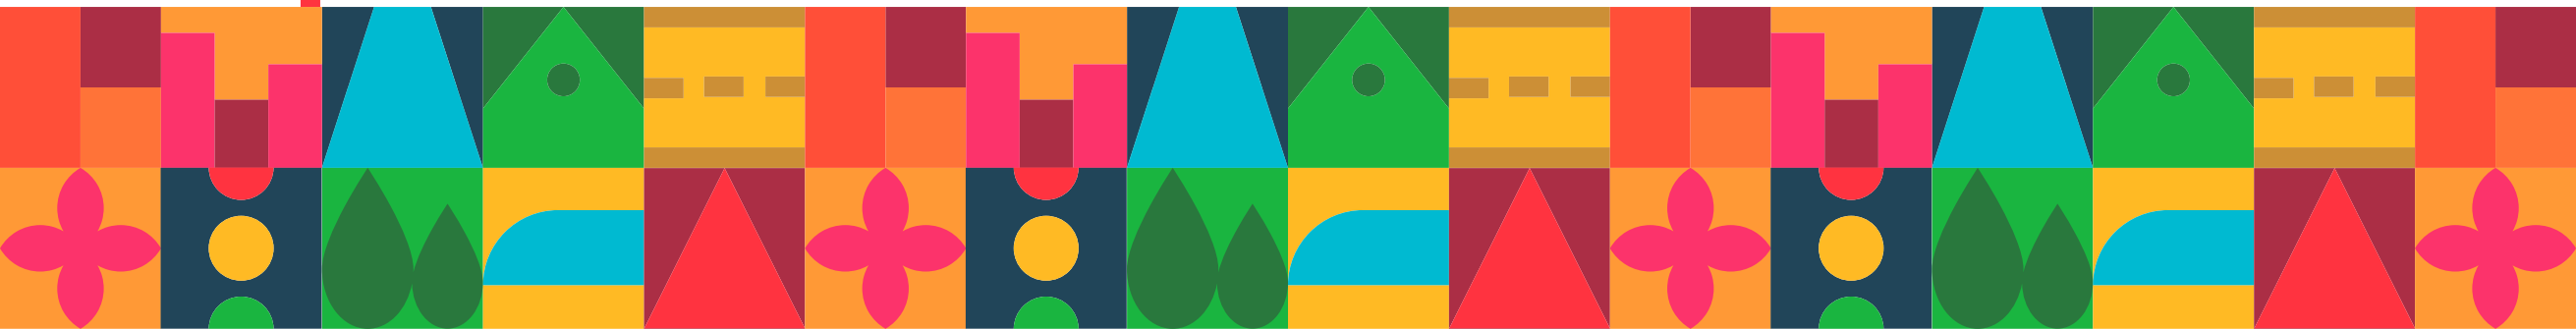

**16:00**      **Balance and perspectives in Brazil. The case of Jundiaí.**

Eduardo Grin. Professor of the Center for Public Administration and Government Studies of the Getulio Vargas Foundation

**16:40**      **Balance and prospects in Chile. The case of Temuco.**

- Camilo Vial. Professor at the Ibero-American Institute for Sustainable Development of the Autonomous University of Chile

**17:20**      **Balance and prospects in Mexico. The case of San Luis de Potosí.**

- Vicente Ugalde Saldaña. Professor at the Center for Demographic, Urban and Environmental Studies of the Colegio de México
- 

**18:00**

**Balance and perspectives in Uruguay. The case of Salto.**

- María del Huerto Delgado. Postgraduate Professor of the Faculty of Economic Sciences and Administration of the University of the Republic and the CLAEH University
- Natalia Bisio. Professor of the Territorial Studies Group of the North Coast Regional University Center, University of the Republic

**18:40**

**Conclusions and final reflections.**

- Adrian Rodriguez Miranda. Professor of the Faculty of Economic Sciences and Administration and coordinator of the Interdisciplinary Nucleus of Territorial Development Studies of the University of the Republic
- Vicente Ugalde Saldaña. Professor at the Center for Demographic, Urban and Environmental Studies of the Colegio de México

**19:15**

**Closing of the seminar.**
